Gold Deposits Associated with a Maar Volcano at Wau, Papua New Guinea

Partly reconstructed schematic section of the "Wau" maar-diatreme system to illustrate the aspects of the genetic model.

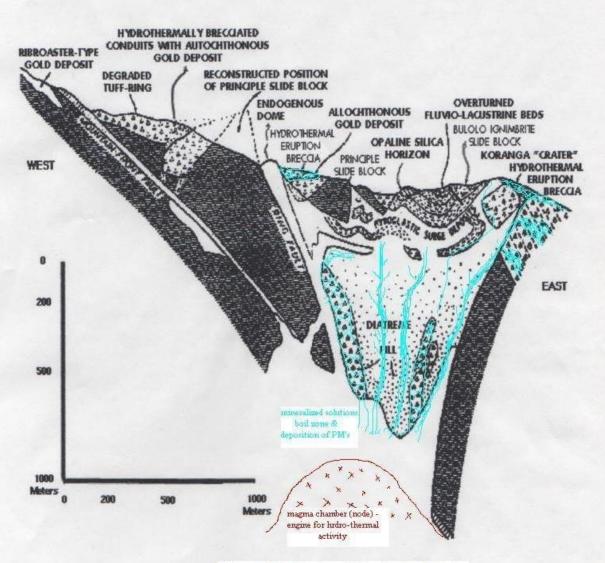

R.H. Silltoe, E.M. Baker and W.A. Brook (Economic Geology Vol.79, 1984)

Gold Deposits Associated with a Maar Volcano at Wau, Papua New Guinea

Partly reconstructed schematic section of the "Wau" maar-diatreme system to illustrate the aspects of the genetic model.

R.H. Silltoe, E.M. Baker and W.A. Brook (Economic Geology Vol.79, 1984)

Note: colorized drawing added to show hypothetical Au & Ag deposition postulated for the Sat Property i.e. low grade ejecta tuff aprons and remnants surrounding higher grade throats (model for nearby Wildcat Deposit)
